The National Security Archive is a non-governmental research institute and library that collects and publishes declassified documents obtained through the U.S. Freedom of Information Act, a public interest law firm defending and expanding public access to government information through the FOIA, and an indexer and publisher of the documents in books, microfiche, and electronic formats.

The National Security Archive was founded in 1985 by a group of journalists and scholars who had obtained documentation under the FOIA and sought a centralized repository for these materials. Over the past twelve years, the Archive has become the world's largest non-governmental library of declassified documents.
